

# NeuroAnalyzer report: Extract LDF Data

NeuroAnalyzer v0.3.0 · MATLAB 2026a · 2026-09-25T17:59:15+00:00 · window image: exportapp

## Extract LDF Data

Extract LDF export (demo) in time window, crop (in demo)

? Help

### 2 Choose time range

Type Start (s) in the "Pick on plot" and then click the start and end on either plot

Start (s)20.000

end (s)280.000

Pick on plotFull range

### 3 Crop

Crop to range

ShowCropped segment

Cropped 20.000-280.000 s  
4 min 20.0 s, 260001 samples

### 4 Save

Save cropped data...

Cropped (stim, LDF, Fz) was saved in DF Processing

Save session...Open session...

Report (PDF)...Methods text...

✓ Session saved in Extract\_LDFApp\_session.mat (1 input file(s) with MTF, settings and results).
